Subject: RE: "Forest Roads and Landslides Team" for OR CZARA Decision

Hi Chris,

I'm happy to help out. Thank you to you and Alan for the helpful emails and for getting us launched. Just to be clear on our current assignment, we are capturing and summarizing key comments and identifying reference documents. We are not doing comment analysis or developing preliminary responses – that will come as a future step. Do I have that straight?

Do you want us to code comments as we move through the letters? If so, do you have a particular format you would like us to use? One thought might be to code the comments according to letter number, their relation to landslides, and their position in the letter (i.e. the first landslide-related comment in letter 67 could be 67-L-1?) I am just thinking that if each is subteam going through and parsing out comments it might be helpful in the end to have a unified approach. I know the excel spreadsheet you sent already has a coding approach, I'm just not sure how to make additional comments fit into that coding system. If you tell me not to worry about coding – I'm cool with that too.

I'll be out of the office tomorrow, but I'll start going through these next week.

Take care,

Teresa

Subject: "Forest Roads and Landslides Team" for OR CZARA Decision

Hi Teresa and Peter,

My understanding is that you are each able to offer a bit of your time to work on the OR CZARA decision this summer and will be able to help support the development of comment responses and the decision rationale for forest roads and landslides portions of the effort.

Attached is a file with the detailed review schedule, which includes milestones due for our "team" on June 24th (landslides) and July 22nd (roads). Also attached is a short document Alan Henning drafted offering suggestions for reviewing OR CZARA public comments. The third attachment is my attempt to pull the landslide-related public comments into separate spreadsheet in order to focus on just those comments. Other documents which will be of use are the decision document and the full spreadsheet, both of which I believe Alan emailed to you on Tuesday.

Alan mentioned that Peter has already reviewed the Oregon Forest Industries Council letter (#77 in the public comment list), so I'm hoping that he can tackle that one. I'm suggesting that Teresa review the Oregon Wild (#58) and Wild Salmon Center et al (#67) letters if possible. I have asked Alan to review the state's submittal, which he has completed, and I have attached his review as a model for you to follow. I will review the NWEA letter (and

attachments), as well as review the comments from the other ten organizations/individuals who identified landslides as an area of concern. (If either of you feels ambitious and has the time, I'm sure I could use help especially on the NWEA submittal...)

If you haven't already, you will need to verse yourselves on the forestry components of the proposed decision document and, for the landslides exercise you will need to summarize the public comments received and any referenced literature and other background information. The public comments can be found at <
<http://coastalmanagement.noaa.gov/nonpoint/oregonDocket/publicComments.html>>. I'm not clear as to your level of familiarity with our OR CZARA machinations, so please let me know if you need additional background materials.

If possible, I would like to get your reviews on the landslide-related comments no later than Tuesday, June 17th. That will give me time to synthesize the review findings and prepare to brief the NOAA/EPA team the following Tuesday. I will be sending out additional information for the roads portion of your review by the end of the month, but you can assume it will follow the same general pattern as for landslides. Please let me know if you have any issue with the timeline.

Thank you in advance for agreeing to support our work on this effort. I promise to be as flexible and understanding as possible should you hit any constraints or need to push back on assignments, etc...

Best Regards,

Chris Solloway
